Subject: Re: [GMCnet] REAR BRAKE TORQUE REACTION SYSTEM.
Date: Wednesday, September 16, 2009 11:20:01 PM

This is a bolt on system.
The only problem is that we cannot seem to create a system for a drum brake system.
The cost of doing it for our drum brake system would be too expensive to develop as a kit.
Were also going to have the new Limited Slip Final drive unit there.
We ran out of time so we cannot demo it there at the convention.
